Professional Summary

CompTIA Security+ certified specialist with 14+ years of hands-on enterprise IT infrastructure, systems administration, network engineering, and security operations experience. Specializing in SOC analysis, threat hunting, SIEM detection engineering (Wazuh, Sysmon), automated log triage, and incident response. Proven track record in executing enterprise network migrations, authoring custom XML detection rules, and isolating lateral movement.

Core Competencies & Technical Stack

- **SIEM & Detection Engineering:** Wazuh SIEM, Sysmon XML Rules, Custom Alert Pipelines, FIM (File Integrity Monitoring)
- **DFIR & Threat Hunting:** Linux Auth/Syslog Forensics, PCAP Packet Analysis (Tshark/Wireshark), Hash Verification, MITRE ATT&CK Mapping
- **Security Automation & Scripting:** Python (Automated IOC & Log Parsers), Bash, PowerShell, YAML
- **Network & Systems Security:** Active Directory (GPO, Event Log Analysis), Dell Versa SD-WAN, Sophos XG, Aruba/Cisco Racking & VOS Upgrades
- **Cloud & DevSecOps:** GCP Multi-Tier Architecture (Terraform IaC, Cloud NAT, Zero Public IP DB Tier), GitHub Actions CI/CD

Security Engineering Projects & Artifacts

PCAP Traffic & Triage Automation

- Processed 50,000+ network packets in < 2.5 seconds using tshark and custom Python parsing scripts.
- Automated detection of web application scans, SQL injection payloads (MITRE T1190), and command execution attempts.

Linux Incident Response & DFIR

- Analyzed 1.2GB of compromised Linux system logs to reconstruct post-incident attack timelines.
- Verified SHA-256 evidence chain integrity and mapped unauthorized SSH key sessions to MITRE T1078.

Wazuh SIEM Rules & FIM Lab

- Authored custom XML detection rules to flag sudo privilege escalation, reducing false

positives by 40%.

- Configured File Integrity Monitoring (FIM) across critical Linux system binaries and configuration files.

Active Directory Security Event Automation

- Developed Python tools to parse Windows Security XML event logs (4624, 4625, 4728).
- Automated real-time alerts for unauthorized 'Domain Admins' group membership modifications (MITRE T1098).

Professional Experience

Jan 2025 – Present Information Technology Support Specialist | Netvantage Partners

- Delivered 1st/2nd line support, endpoint deployment, diagnostics, and hardened onboarding across multi-tenant networks.
- Executed patch management and vulnerability mitigation; investigated security incidents including malware alerts and unauthorized access attempts.
- Decommissioned legacy Cisco switches/controllers and deployed new Aruba switches, controllers, and sensor LAN cabling (Mastercard Zimbabwe project).

Jan 2021 – Present IT Support Specialist (Contract & Consulting) | Zuetech Technology Solutions

- Managed Active Directory access control, RBAC, least-privilege, patch deployment, and vulnerability mitigations.
- Deployed Dell Versa SD-WAN hardware, performed Versa Operating System (VOS) upgrades, live migrations, and IP validation.
- Monitored telemetry for security anomalies, applying security-analyst triage principles to identify and escalate threats.

Jan 2019 – Dec 2020 Desktop Support Technician | Raising Dawn Investment

- Administered user accounts, permissions, and security groups for 120+ users within Active Directory.
- Monitored Sophos Endpoint Protection and Sophos Firewall telemetry, escalating security anomalies and access events.

Jan 2016 – Dec 2018 Information Technology Support Technician | Compusys Technology

- Managed access controls, applied security patches, and investigated authentication/access-control issues across multi-client environments.
- Re-imaged laptop fleets to corporate security baselines, joined endpoints to domain environments, and installed network switches/APs (Ericsson Zimbabwe project).

Jul 2012 – Dec 2015 Help Desk Support Technician | Sherman IT

- Supported 200+ users across multiple business locations, handling hardware, software, networking, and SLA-bound issues.
- Executed server migrations, HP switch deployments, VoIP rollouts, PC re-imaging, PoE IP camera integrations, and secure legacy hardware decommissioning (AJP Group / Abbeydale

Group projects).

Certifications & Education

- **CompTIA Security+ (SY0-701)** — CompTIA
- **Google Cybersecurity Professional Certificate** — Google | **Google IT Support Professional Certificate** — Google
- **BSc in Computer Science** — Unicaf University
