PROFESSIONAL SUMMARY

CompTIA Security+ certified IT professional with 12+ years of progressive experience across enterprise IT infrastructure, systems administration, network engineering, and security-conscious technical support — including enterprise SD-WAN deployment and network migrations. Independently developed SIEM detection engineering, threat hunting, and security automation skills (Wazuh, Sysmon, Python), demonstrated in a public, tested portfolio at masiya-hub.org.

CORE COMPETENCIES & TECHNICAL STACK

- **SIEM & Detection Engineering:** Wazuh SIEM, Sysmon XML Rules, Custom Alert Pipelines, FIM (File Integrity Monitoring)
- **DFIR & Threat Hunting:** Linux Auth/Syslog Forensics, PCAP Packet Analysis (Tshark/Wireshark), Hash Verification, MITRE ATT&CK Mapping
- **Security Automation & Scripting:** Python (Automated IOC & Log Parsers), Bash, PowerShell, YAML
- **Network & Systems Security:** Active Directory (GPO, Event Log Analysis), Dell Versa SD-WAN, Sophos XG, Aruba/Cisco Racking & VOS Upgrades
- **Cloud & DevSecOps:** GCP Multi-Tier Architecture (Terraform IaC, Cloud NAT, No Public IP Assigned to Internal Database Tier), GitHub Actions CI/CD

SECURITY ENGINEERING PROJECTS & ARTIFACTS

PCAP Traffic & Triage Automation

- Processed captured network traffic using Tshark and custom Python parsing scripts to identify suspicious HTTP requests, hosts, protocols, and indicators of compromise.
- Automated detection of web application scans, SQL injection payloads (MITRE T1190), and command execution attempts.

Linux Incident Response & DFIR

- Analyzed Linux authentication and system logs to reconstruct post-incident attack timelines.
- Verified SHA-256 evidence chain integrity and mapped unauthorized SSH key sessions to MITRE T1078.

Wazuh SIEM Rules & FIM Lab

- Authored custom XML detection rules to flag sudo privilege escalation and validated them against test events.
- Configured File Integrity Monitoring (FIM) across critical Linux system binaries and configuration files.

Active Directory Security Event Automation

- Developed Python tools to parse Windows Security XML event logs (4624, 4625, 4728).
- Automated real-time alerts for unauthorized 'Domain Admins' group membership modifications (MITRE T1098).

PROFESSIONAL EXPERIENCE

Jan 2025 – Present Information Technology Support Specialist | *Netvantage Partners*

- Deliver 1st and 2nd line IT support across multiple client environments, including secure endpoint deployment, desktop/laptop diagnostics, and hardened onboarding processes.
- Support vulnerability mitigation through structured patch management, maintaining compliant and up-to-date systems across client networks.
- Investigate and resolve security-relevant incidents, including malware alerts, unauthorized access attempts, and connectivity disruptions.
- Develop IT support documentation and incident-handling procedures to standardize response consistency and reduce resolution time.

Jan 2021 – Present IT Support Specialist (Contract & Consulting) | *Zueteck Technology Solutions*

- Provide enterprise IT support, infrastructure administration, and network operations across client environments, including Active Directory administration, RBAC, and least-privilege access control.
- Physically deploy and configure enterprise Dell Versa SD-WAN appliances, including Versa Operating System (VOS) upgrades, IP configuration, live migration support, and connectivity validation.
- Deliver endpoint protection, patch deployment, and vulnerability mitigation across client networks; troubleshoot Microsoft

365 and application issues.

- Monitor endpoint, network, and system activity for anomalies, applying security-analyst triage principles to identify and escalate security-relevant incidents.
- Maintain technical documentation and SOP development to standardize client support delivery.
- Client project — Network Infrastructure Upgrade, Mastercard Zimbabwe (Mar–Apr 2022): installed sensor LAN cabling, decommissioned legacy Cisco switches/controllers/APs, and racked/installed new Aruba controllers, switches, and access points.
- Client project — SD-WAN Circuit Deployment, SITA AERO (Jul 2026): racked, powered on, and configured two Dell Versa VEP1485 SD-WAN appliances via console CLI (IP/subnet/gateway configuration), cabled per installation diagram, and connected each device to a dedicated internet circuit; verified connectivity on both.
- Client project — Qatar Airways VOS Upgrade & SD-WAN Migration, Harare Airport Back Office & City Office (Aug 2026): performed VOS upgrading, device onboarding, and SD-WAN migration on Dell VEP1425 appliances across both sites.

Jan 2019 – Dec 2020 Desktop Support Technician | *Raising Dawn Investment*

- Administered user accounts, permissions, and security groups for 120+ users; supported access-control administration.
- Monitored Sophos Endpoint Protection and firewall telemetry, escalating security anomalies and endpoint issues.
- Supported backup, recovery, and business continuity operations, maintaining technical and operational documentation.

Jan 2016 – Dec 2018 Information Technology Support Technician | *Compusys Technology*

- Delivered desktop, network, and infrastructure support across multiple client environments; managed user access controls and permissions.
- Applied security patches, supported vulnerability remediation, and investigated authentication/access-control issues.
- Client project — IT Equipment Deployment and Configuration, Ericsson Zimbabwe (Nov 2016–Dec 2018): re-imaged laptop fleets to company standards, joined devices to the domain, configured email access, and installed network switches/access points.

Mar 2014 – Dec 2015 Help Desk Support Technician | *shermanit*

- Supported 200+ users across multiple business locations, providing remote and onsite technical support within defined SLA requirements.
- Troubleshoot hardware, software, networking, and authentication issues; supported software deployments and infrastructure updates.
- Client project — IT Infrastructure Upgrade, AJP Group (May–Aug 2015): retired outdated systems, onboarded new devices to the domain, implemented VoIP phone systems, and migrated data to new systems.

CERTIFICATIONS & EDUCATION

- **CompTIA Security+ (SY0-701)** — CompTIA
- **Google Cybersecurity Professional Certificate** — Google | **Google IT Support Professional Certificate** — Google
- **BSc in Computer Science** — Unicaf University (In Progress)
