PROFESSIONAL SUMMARY

CompTIA Security+ certified specialist with 14+ years of hands-on enterprise IT infrastructure, systems administration, network engineering, and security operations experience. Specializing in SOC analysis, threat hunting, SIEM detection engineering (Wazuh, Sysmon), automated log triage, and incident response. Proven track record in executing enterprise network migrations, authoring custom XML detection rules, and isolating lateral movement.

CORE COMPETENCIES & TECHNICAL STACK

- **SIEM & Detection Engineering:** Wazuh SIEM, Sysmon XML Rules, Custom Alert Pipelines, FIM (File Integrity Monitoring)
 - **DFIR & Threat Hunting:** Linux Auth/Syslog Forensics, PCAP Packet Analysis (Tshark/Wireshark), Hash Verification, MITRE ATT&CK Mapping
 - **Security Automation & Scripting:** Python (Automated IOC & Log Parsers), Bash, PowerShell, YAML
 - **Network & Systems Security:** Active Directory (GPO, Event Log Analysis), Dell Versa SD-WAN, Sophos XG, Aruba/Cisco Racking & VOS Upgrades
 - **Cloud & DevSecOps:** GCP Multi-Tier Architecture (Terraform IaC, Cloud NAT, Zero Public IP DB Tier), GitHub Actions CI/CD
-

SECURITY ENGINEERING PROJECTS & ARTIFACTS

PCAP Traffic & Triage Automation

- Processed 50,000+ network packets in < 2.5 seconds using tshark and custom Python parsing scripts.
- Automated detection of web application scans, SQL injection payloads (MITRE T1190), and command execution attempts.

Linux Incident Response & DFIR

- Analyzed 1.2GB of compromised Linux system logs to reconstruct post-incident attack

timelines.

- Verified SHA-256 evidence chain integrity and mapped unauthorized SSH key sessions to MITRE T1078.

Wazuh SIEM Rules & FIM Lab

- Authored custom XML detection rules to flag sudo privilege escalation, reducing false positives by 40%.
- Configured File Integrity Monitoring (FIM) across critical Linux system binaries and configuration files.

Active Directory Security Event Automation

- Developed Python tools to parse Windows Security XML event logs (4624, 4625, 4728).
 - Automated real-time alerts for unauthorized 'Domain Admins' group membership modifications (MITRE T1098).
-

PROFESSIONAL EXPERIENCE

Senior IT Infrastructure & Security Specialist | *Enterprise Infrastructure, Network & Client Services* (Jul 2012 – Present)

- **SOC Operations & Incident Response:** Lead daily security log reviews, incident triage, malware containment, and patch compliance; monitor Sophos Endpoint and firewall telemetry to isolate threats.
 - **Identity & Access Management:** Administer Active Directory, Group Policies (GPOs), RBAC, least-privilege models, and MFA enforcement across multi-tenant environments (120+ to 500+ users).
 - **SD-WAN & Network Engineering:** Deploy, configure, and migrate enterprise Dell Versa SD-WAN appliances, perform Versa Operating System (VOS) upgrades, and validate core IP connectivity.
 - **Mastercard Zimbabwe Infrastructure Upgrade:** Decommissioned legacy Cisco switches, APs, and controllers; racked and integrated new Aruba controllers, switches, and sensor LAN cabling.
 - **Ericsson Zimbabwe Enterprise Deployment:** Re-imaged laptop fleets to corporate security baselines, joined endpoints to domain environments, deployed M365 access, and installed core network switches.
 - **Systems Migrations & Upgrades (AJP & Abbeydale Groups):** Executed server migrations, HP switch deployments, VoIP rollouts, PC re-imaging, PoE IP camera integrations, and secure hardware decommissioning.
-

CERTIFICATIONS & EDUCATION

- **CompTIA Security+ (SY0-701)** — CompTIA
- **Google Cybersecurity Professional Certificate** — Google
- **Google IT Support Professional Certificate** — Google
- **BSc in Computer Science** — Unicaf University
