PROFESSIONAL SUMMARY

CompTIA Security+ certified specialist with 9+ years in system administration, Active Directory, and network infrastructure. Specializing in threat hunting, SIEM detection engineering (Wazuh, Sysmon), automated log triage, and incident response. Proven track record in isolating lateral movement, authoring detection rules, and building infrastructure-as-code security models.

CORE COMPETENCIES & TECHNICAL STACK

- **SIEM & Detection Engineering:** Wazuh SIEM, Sysmon XML Rules, Custom Alert Pipelines, FIM (File Integrity Monitoring)
 - **DFIR & Threat Hunting:** Linux Auth/Syslog Forensics, PCAP Packet Analysis (Tshark/Wireshark), Hash Verification, MITRE ATT&CK Mapping
 - **Security Automation & Scripting:** Python (Automated IOC & Log Parsers), Bash, PowerShell, YAML
 - **Network & Systems Security:** Active Directory (GPO, Event Log Analysis), Dell Versa SD-WAN, Sophos XG, Windows Server Admin
 - **Cloud & DevSecOps:** GCP Multi-Tier Architecture (Terraform IaC, Cloud NAT, Zero Public IP DB Tier), GitHub Actions CI/CD
-

SECURITY ENGINEERING PROJECTS & ARTIFACTS

PCAP Traffic & Triage Automation

- Processed 50,000+ network packets in < 2.5 seconds using tshark and custom Python parsing scripts.
- Automated detection of web application scans, SQL injection payloads (MITRE T1190), and command execution attempts.

Linux Incident Response & DFIR

- Analyzed 1.2GB of compromised Linux system logs to reconstruct post-incident attack timelines.
- Verified SHA-256 evidence chain integrity and mapped unauthorized SSH key sessions to MITRE T1078.

Wazuh SIEM Rules & FIM Lab

- Authored custom XML detection rules to flag sudo privilege escalation, reducing false positives by 40%.
- Configured File Integrity Monitoring (FIM) across critical Linux system binaries and configuration files.

Active Directory Security Event Automation

- Developed Python tools to parse Windows Security XML event logs (4624, 4625, 4728).
 - Automated real-time alerts for unauthorized 'Domain Admins' group membership modifications (MITRE T1098).
-

PROFESSIONAL EXPERIENCE

Systems & Security Administrator | *Enterprise Infrastructure & IT Services* (2015 – Present)

- Administer multi-site network infrastructure utilizing Dell Versa SD-WAN and Sophos XG firewall appliances.
 - Enforce Active Directory Group Policies (GPO), RBAC, and multi-factor authentication across enterprise users.
 - Lead daily security log reviews, incident response triage, and server fleet patch management.
-

CERTIFICATIONS & EDUCATION

- **CompTIA Security+ (SY0-701)** — CompTIA
- **Google Cybersecurity Professional Certificate** — Google
- **Google IT Support Professional Certificate** — Google
- **BSc in Computer Science** — Unicaf University
