PROFESSIONAL SUMMARY

CompTIA Security+ certified specialist with 12+ years of hands-on enterprise IT infrastructure, systems administration, network engineering, and security-focused operations experience. Specializing in SOC analysis, threat hunting, SIEM detection engineering (Wazuh, Sysmon), automated log triage, and incident response. Proven track record in executing enterprise network migrations, authoring custom XML detection rules, and isolating lateral movement.

CORE COMPETENCIES & TECHNICAL STACK

- **SIEM & Detection Engineering:** Wazuh SIEM, Sysmon XML Rules, Custom Alert Pipelines, FIM (File Integrity Monitoring)
- **DFIR & Threat Hunting:** Linux Auth/Syslog Forensics, PCAP Packet Analysis (Tshark/Wireshark), Hash Verification, MITRE ATT&CK Mapping
- **Security Automation & Scripting:** Python (Automated IOC & Log Parsers), Bash, PowerShell, YAML
- **Network & Systems Security:** Active Directory (GPO, Event Log Analysis), Dell Versa SD-WAN, Sophos XG, Aruba/Cisco Racking & VOS Upgrades
- **Cloud & DevSecOps:** GCP Multi-Tier Architecture (Terraform IaC, Cloud NAT, No Public IP Assigned to Internal Database Tier), GitHub Actions CI/CD

SECURITY ENGINEERING PROJECTS & ARTIFACTS

PCAP Traffic & Triage Automation

- Processed captured network traffic using Tshark and custom Python parsing scripts to identify suspicious HTTP requests, hosts, protocols, and indicators of compromise.
- Automated detection of web application scans, SQL injection payloads (MITRE T1190), and command execution attempts.

Linux Incident Response & DFIR

- Analyzed Linux authentication and system logs to reconstruct post-incident attack timelines.
- Verified SHA-256 evidence chain integrity and mapped unauthorized SSH key sessions to MITRE T1078.

Wazuh SIEM Rules & FIM Lab

- Authored custom XML detection rules to flag sudo privilege escalation and validated them against test events.
- Configured File Integrity Monitoring (FIM) across critical Linux system binaries and configuration files.

Active Directory Security Event Automation

- Developed Python tools to parse Windows Security XML event logs (4624, 4625, 4728).
- Automated real-time alerts for unauthorized 'Domain Admins' group membership modifications (MITRE T1098).

PROFESSIONAL EXPERIENCE

Mar 2014 – Present Senior IT Infrastructure & Security Specialist | *Enterprise Infrastructure, Network & Client Services*

- Lead daily security log reviews, incident response triage, malware containment, and structured patch management across multi-tenant environments; apply security-analyst triage principles to monitor Sophos Endpoint and firewall telemetry for anomalous activity.
- Administer user accounts, permissions, Active Directory Group Policies (GPOs), RBAC, least-privilege models, and multi-factor authentication (MFA) across enterprise client environments.
- Physically deploy, configure, and migrate enterprise Dell Versa SD-WAN appliances, perform Versa Operating System (VOS) upgrades, IP configuration, and live connectivity validation.
- Decommissioned legacy Cisco switches, APs, and controllers during enterprise network upgrades (Mastercard Zimbabwe), racking and installing new Aruba controllers, switches, and sensor LAN cabling.
- Re-imaged laptop fleets to corporate security baselines during enterprise deployments (Ericsson Zimbabwe), joined endpoints to Active Directory domains, configured M365 email access, and installed core switches/APs.
- Executed server migrations, HP switch deployments, VoIP phone rollouts, PC re-imaging, PoE IP camera integrations, and secure legacy hardware decommissioning across multi-site client projects (AJP Group / Abbeydale Group / Sherman IT).
- Provide 1st through 3rd line technical support, endpoint hardening, desktop diagnostics, backup/business continuity

operations, and SOP documentation to standardize incident response.

CERTIFICATIONS & EDUCATION

- **CompTIA Security+ (SY0-701)** — CompTIA
- **Google Cybersecurity Professional Certificate** — Google | **Google IT Support Professional Certificate** — Google
- **BSc in Computer Science** — Unicaf University (In Progress)
