PROFESSIONAL SUMMARY

CompTIA Security+ certified specialist with 12+ years of enterprise IT infrastructure, systems administration, and network security experience. Specializing in SOC analysis, threat hunting, SIEM detection engineering (Wazuh, Sysmon), automated log triage, and incident response. Proven track record in isolating lateral movement, authoring custom XML detection rules, and building infrastructure-as-code security models.

CORE COMPETENCIES & TECHNICAL STACK

- **SIEM & Detection Engineering:** Wazuh SIEM, Sysmon XML Rules, Custom Alert Pipelines, FIM (File Integrity Monitoring)
 - **DFIR & Threat Hunting:** Linux Auth/Syslog Forensics, PCAP Packet Analysis (Tshark/Wireshark), Hash Verification, MITRE ATT&CK Mapping
 - **Security Automation & Scripting:** Python (Automated IOC & Log Parsers), Bash, PowerShell, YAML
 - **Network & Systems Security:** Active Directory (GPO, Event Log Analysis), Dell Versa SD-WAN, Sophos XG, Windows Server Admin
 - **Cloud & DevSecOps:** GCP Multi-Tier Architecture (Terraform IaC, Cloud NAT, Zero Public IP DB Tier), GitHub Actions CI/CD
-

SECURITY ENGINEERING PROJECTS & ARTIFACTS

PCAP Traffic & Triage Automation

- Processed 50,000+ network packets in < 2.5 seconds using tshark and custom Python parsing scripts.
- Automated detection of web application scans, SQL injection payloads (MITRE T1190), and command execution attempts.

Linux Incident Response & DFIR

- Analyzed 1.2GB of compromised Linux system logs to reconstruct post-incident attack

timelines.

- Verified SHA-256 evidence chain integrity and mapped unauthorized SSH key sessions to MITRE T1078.

Wazuh SIEM Rules & FIM Lab

- Authored custom XML detection rules to flag sudo privilege escalation, reducing false positives by 40%.
- Configured File Integrity Monitoring (FIM) across critical Linux system binaries and configuration files.

Active Directory Security Event Automation

- Developed Python tools to parse Windows Security XML event logs (4624, 4625, 4728).
 - Automated real-time alerts for unauthorized 'Domain Admins' group membership modifications (MITRE T1098).
-

PROFESSIONAL EXPERIENCE

Information Technology Support Specialist | Netvantage Partners (Jan 2025 – Present)

- Delivered 1st and 2nd line IT support across client environments, including secure endpoint deployment, desktop diagnostics, and hardened onboarding processes.
- Supported vulnerability mitigation through structured patch management, maintaining compliant and up-to-date systems across client networks.
- Investigated and resolved security incidents, including malware alerts, unauthorized access attempts, and connectivity disruptions.
- Developed IT support documentation and incident-handling procedures to standardize response consistency and reduce resolution time.

Information Technology Support Specialist (Contract & Consulting) | Zuetech Technology Solutions (Jan 2021 – Present)

- Administered enterprise infrastructure, Active Directory access control, RBAC, and least-privilege policies across multi-tenant environments.
- Configured Dell Versa SD-WAN deployments, Versa Operating System (VOS) upgrades, and live SD-WAN device onboardings and migrations.
- Managed endpoint protection, patch deployments, and vulnerability mitigations while monitoring network telemetry for anomalous activity.
- Monitored system logs for security-relevant anomalies, applying security-analyst triage principles to identify and escalate potential threats.

Desktop Support Technician | Raising Dawn Investment (Jan 2019 – Dec 2020)

- Administered user accounts, permissions, and security groups for 120+ users within Active

Directory.

- Monitored Sophos Endpoint Protection and Sophos Firewall telemetry, escalating security anomalies and unauthorized access events.
- Supported backup, recovery, business continuity execution, and technical operational documentation.

Information Technology Support Technician | *Compusys Technology* (Jan 2016 – Dec 2018)

- Delivered desktop, network, and infrastructure support across multi-client environments.
- Managed user access controls, permissions, applied security patches, and supported vulnerability remediation.
- Investigated authentication and access-control issues to maintain system compliance.

Help Desk Support Technician | *Sherman IT* (Mar 2014 – Dec 2015)

- Provided remote and onsite technical support for 200+ users across multiple business locations.
 - Troubleshoot hardware, software, networking, and authentication issues within defined SLAs.
-

CERTIFICATIONS & EDUCATION

- **CompTIA Security+ (SY0-701)** — CompTIA
- **Google Cybersecurity Professional Certificate** — Google
- **Google IT Support Professional Certificate** — Google
- **BSc in Computer Science** — Unicaf University
